Seat Height Adjustment - 7 – Allows you to adjust the seat so feet meet the floor or a stable footrest, but is high enough that knees are below hips.
Raising: Lift your weight off the seat and pull up on the lever (7), releasing when desired height is achieved.
Lowering: While seated, lift up on the lever (7); releasing when desired height is achieved.

Seat Tilt Adjustment - 6 – Synchro movement of backrest and seat pan may reduce lower back load. Seat tilt is not an independent feature on this model.
Adjust: Recline and tilt are adjusted with a single lever (6) on the chair side. Pull the lever out (6) to adjust the chair until the tilt is achieved, then push the lever (6) in to lock tilt position.

Backrest Tilt Adjustment - 2 – Allows user to adjust angle of backrest. A slight back tilt transfers some body weight to the backrest. Synchro movement of backrest and seat pan may reduce lower back load.
Adjust: Recline and tilt are adjusted with a single lever (2) on the chair side. Pull the lever out (2) to adjust the chair until the tilt is achieved, then push the lever (2) in to lock tilt position.

Tension Adjustment - 9 – Will increase or decrease the amount of effort needed to recline in the chair. If there is too much play within the backrest, tighten for desired support and safety.
Adjust: Loosen the knob (9) to adjust the chair until the desired tension is achieved, then tighten the knob (9).

Backrest Height & Lumbar Support - 1, 11 – Malaga’s newly designed ratchet back provides a smooth 2.5” height adjustment with built-in lumbar support provides superior style and support.
Adjust: Lift the backrest (1) up or down to adjust to your desired settings.

Arm Adjustment - 4, 5 – Reduces the work of the shoulders and upper arms. Height, width and pivoting adjustable padded armrests provide the most features. Support should be provided for the forearms, not just the elbows.
Height Adjust = Push in on button (4) and lift or lower arms, releasing to set when desired position is achieved.
Width Adjust = Friction adjustments (5); no buttons necessary. Push and/or pull to desired position.

MANAGERIAL / CONFERENCE

GL 3140A
aka MALAGA

The Malaga™ Global Industries multi-tilter chair by CCi offers exceptional ergonomic support with a range of adjustability to create a near-custom fit. The multi-tilt mechanism allows seat and back position to be configured independently of each other to suit individual preferences for comfort and working position. The lumbar support adjusts both horizontally and vertically. A thick padded seat and back also contribute to Malaga’s outstanding comfort. Malaga is available in the full range of CCi’s fabrics.

Seat height: 16"W x 20"H
Overall size: 26 ½"W x 23"D
Overall height: 42"H

Height adjustable arms are standard on all arm models.

Width adjustment is standard on all arms models. Provides 2" horizontal arm space adjustment.

Height and seat pan adjustments provide additional leg support for the user. Waterfall front design provides for additional leg comfort.

Newly designed ratchet back provides a smooth 2 ¼” height adjustment for effortless adjustability.

Waterfall front design provides for additional leg comfort.
